Canadian Technical Report of Fisheries and Aquatic Sciences No. 1185

Canadian Technical Report of Fisheries and Aquatic Sciences

These reports contain scientific and technical information that represents an important contribution to existing knowledge but which for some reason may not be appropriate for primary scientific (i.e. *Journal*) publication. Technical Reports are directed primarily towards a worldwide audience and have an international distribution. No restriction is placed on subject matter and the series reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Technical Reports may be cited as full publications. The correct citation appears above the abstract of each report. Each report will be abstracted in *Aquatic Sciences and Fisheries Abstracts* and will be indexed annually in the Department's index to scientific and technical publications.

Numbers 1-456 in this series were issued as Technical Reports of the Fisheries Research Board of Canada. Numbers 457-714 were issued as Department of the Environment, Fisheries and Marine Service, Research and Development Directorate Technical Reports. Numbers 715-924 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Technical Reports. The current series name was changed with report number 925.

Details on the availability of Technical Reports in hard copy may be obtained from the issuing establishment indicated on the front cover.

Rapport technique canadien des sciences halieutiques et aquatiques

Ces rapports contiennent des renseignements scientifiques et techniques qui constituent une contribution importante aux connaissances actuelles mais qui, pour une raison ou pour une autre, ne semblent pas appropriés pour la publication dans un journal scientifique. Il n'y a aucune restriction quant au sujet, de fait, la série reflète la vaste gamme des intérêts et des politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les Rapports techniques peuvent être considérés comme des publications complètes. Le titre exact paraîtra au haut du résumé de chaque rapport, qui sera publié dans la revue *Aquatic Sciences and Fisheries Abstracts* et qui figurera dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1-456 de cette série ont été publiés à titre de Rapports techniques de l'Office des recherches sur les pêcheries du Canada. Les numéros 457-714, à titre de Rapports techniques de la Direction générale de la recherche et du développement, Service des pêches et de la mer, ministère de l'Environnement. Les numéros 715-924 ont été publiés à titre de Rapports techniques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 925.

La page couverture porte le nom de l'établissement auteur où l'on peut se procurer les rapports sous couverture cartonnée.

ABSTRACT

Brinckmann-Voss, Anita. 1983. British Columbia marine faunistic survey report on the Hydrozoa: Part II. Hydroids. Can. Tech. Rep. Fish. Aquat. Sci. 1185: iii + 20 p.

This report identifies and lists hydroids collected between 1907 to 1981 by the Pacific Biological Station. The specimens are listed under catalogue numbers from the National Museum of Natural Sciences in Ottawa, Canada.

RÉSUMÉ

Brinckmann-Voss, Anita. 1983. British Columbia marine faunistic survey report on the Hydrozoa: Part II. Hydroids. Can. Tech. Rep. Fish. Aquat. Sci. 1185: iii + 20 p.

Le présent rapport énumère et identifie les hydraires échantillonnés de 1907 à 1981 par le personnel de la Station de biologie du Pacifique. Les spécimens sont répertoriés selon les numéros de catalogue de Musée national des sciences naturelles à Ottawa (Canada).

INTRODUCTION

The hydroids listed in this report are from the collections of the Pacific Biological Station in Nanaimo, with the bulk of the material collected in 1934/35 by various collectors and since 1961 by D. B. Quayle.

The collection proved to be extremely interesting, firstly on account of the taxonomic variety, secondly on account of its range of locations. It includes various stations from the west-northwest and northeast coasts of Vancouver Island up to the Queen Charlotte Islands - areas where it is difficult to collect and therefore extremely expensive to investigate.

As already mentioned in the report on the medusae (Brinckmann-Voss 1974) more care is needed before assigning Hydrozoa specimens to a species today than at the time of Fraser's monograph (Fraser 1937, Hydroids of the Pacific coast of Canada and the United States). Therefore, numerous specimens were only assigned a genus name until more comparative work with them can be done. The identifications are given in systematic order followed by a location listing.

This study was done under contract with the Pacific Biological Station, Nanaimo. I wish to thank Mary N. Arai for the preliminary sorting of material and Kathy McGrath for preparation of the lists.
